

Safety Information

Acalypha Umbrosa

Can grow between 4-6 ft. Has a long bloom period which makes it a popular house plan. Can tolerate a wide range of soil conditions. Non-poisonous

Bidens Socorrensis

Watch for this plant's sharp pappi (things on the end) which can poke skin and cause irritation. Their seeds can stick to your clothing. Non-poisonous

Castilleja Socorrensis

The flowers of these plants was once eaten as a sort of condiment. Used to make their hair glossy. However, if the green parts of the plant, or its roots are consumed, it can be very toxic.

Hypericum Eastwoodianum

This species of plant is invasive, and has a nearly worldwide distribution. Can grow upwards of 10 feet!. Can have "hair" from non to long, fine fibers on its leaves.

Pleurothallis Unguicallosa

This flower typically blooms through the later spring into the summer. Referred to as "The Clawed Pleurothallis", due to its claw-like petals once it finishes blooming. Non-poisonous

Physalis Mimulus

Notable Feature: The formation of a larger, papery husk, which encloses the fruit inside

Physalis Mimulus Fruit

The fruit is small and orange, similar in structure to a small tomato. Do NOT eat the fruit, as some are no edible

Aristida Vaginata

These have ascending and erect stems, with leaves that bundle around the base. *These can have sharp edges and are not to be touched.
Can create paper-like cut

Ilex Socorroensis

These plants have simple, alternate glossy leaves. These leaves are spiny! Touch at your own risk.
*The fruits ripen in winter time and can be toxic.
Do not ingest the berries

Sideroxylon Socorrense

Grows in places seasonally humid. It is considered "vulnerable", due to sheep grazing on it twice a year. The fruits are the favorite for the Socorro mockingbird and the Socorro dove.

Bigfoot

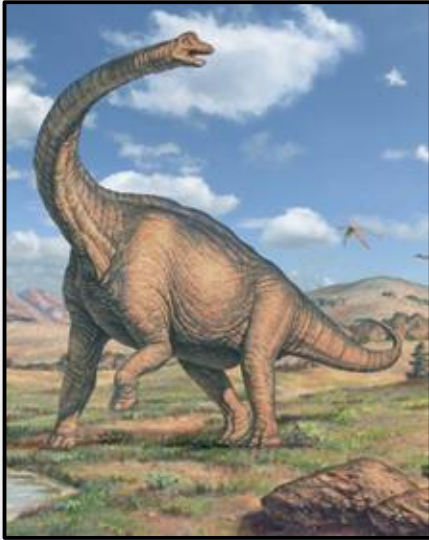

6-9 ft tall, Covered in thick black, dark brown, or reddish hair. Large feet (2 ft long, 8 in wide). Omnivores. Shy and reclusive. Resembles a large ape. Not friendly.

T-Rex

40 ft long, 20 ft tall, weighs 5 tons. Run up to 20 mph. Lifespan of 30 years. Females larger than males. Carnivores. Large teeth, claws, and insatiable appetite make them very dangerous. Bad breath.

Brachiosaurus

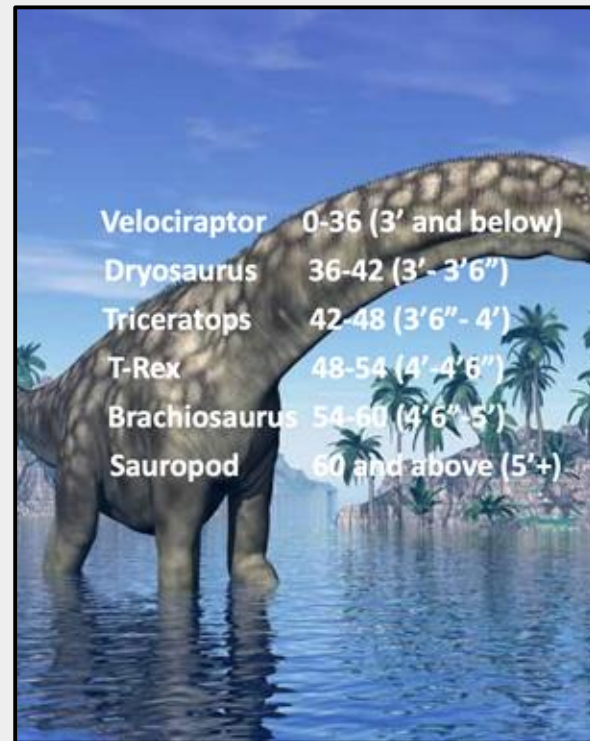

Herbivore. 82-98 ft long, 50 ft tall, weighs 62 tons. Gigantothermic - between warm and cold-blooded. Nostrils on top of head. Formed herds. Native to North America.

Velociraptor

Carnivore. From Mongolia, Canada, and Kyrgystan. 6 ft long, 16 lbs. Very aggressive. Sharp teeth and claws make them very dangerous. Run up to 40 mph. Covered in feathers.
